The Australian Private Banking Conference will be held in Sydney in June 2012. As the Australian High Net Worth (HNW) sector continues to grow the Conference will focus on what the HNW client requires from their private wealth manager and how the trusted adviser can both retain and adopt new clients.

The conference will provide an opportunity for delegates, speakers and partners to meet and share thoughts on the challenges private wealth advisers and their personnel face as the challenges and requirements of their clients change.

The Australian Private Banking Conference is the major information sharing, market update and strategy event for the Private Banking sector in Australia and attracts the most senior private bankers and heads of private banks in Australia.

Following the Conference, the Australian Private Banking Council hosts the Australian Private Banking Awards which are the only awards for the Australian private banks and private wealth managers.

The Australian Private Banking Awards are voted for by the people who matter most - their High Net Worth clients. The awards recognise both institutions and individuals within private banking, private wealth and private client services who are excelling in the exact areas that our research shows are important to HNW clients.
